Report on
Nature Club 2018-19

The world in 21st century is developing at alarming rate while on the other hand the destruction of natural resources is going on. Efforts to meet the need of a growing population in an interconnected but unequal and human-dominated world are ignoring the Earth's essential life support. Today, the human society is facing severe environmental problems like climate change, greenhouse effect, energy crisis, depletion of natural resources, pollution of air, water, soil, etc. the scope of the problems is from local level to global level. Higher educational institution can be the best solution to solve this situation. It is the duty of colleges to educate staff, student and society so to create awareness.

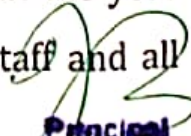

Mission:

To inculcate love and respect among the Principal, Staff and students for nature and thus work with a global perspective.

Objectives:

Motivating staff and students to value environment. To make them aware about the grave situation of nature and means for its conservation.

Our college has established Nature Club for create awareness and protect nature. Prof. S. K. Pawar is the Co-ordinator and Prof. B. M. Patil & Prof. S. G. Rakshe is the member of the nature club. Throughout the year various activities are conducted. On very Saturday Principal, staff and all

Principal

Arts & Commerce College
Khanapur, Dist. Solapur

the students of the college participate in the cleaning of campus. Student were encouraged to spend some time in cleaning of college campus and surrounding to explain them the benefits of maintaining hygienic condition. Even on every Saturday it is informed to all the staff and students to come by bicycle or walking to the college instead off bus, two wheelers, etc so that we can reduce air pollination.

On 5th June 2018 Van Mahotsav was celebrated in our college by planting the tree. Van Mahotsav is a festival which was started by Kulapati Kanaiyalal Munshi Ji, the union minister for agriculture to create enthusiasm among masses for forest conservation and planting trees.

On 9th Aug 2018 Trees plantations program was organized in our college. Trees were planted by the Principal, all the staff members, NCC cadets, NSS voluntaries and other B.Com & B.A students of our college in campus area. Different types of trees were planted at different areas like backside, beside college play ground and in front area of the campus to save and protect our nature.

In the month of April 2019 B. Com Final year students took up a project to save birds and create water resources because of climate change the environment has become very hot and birds will not get water easily so final students brought earthen pots and tied with ropes on the branches of trees and roof in the parking area. Everyday water is poured in the pots so that birds and get water easily. Such kind of activities where conducted through the year to save and protect the Nature by Nature Club.
